Module 1

1. The three basic technologies are a web server, web browser, and HTTP.

2. Local files are the files on a computer that are uploaded to a website. A web host is a public server provided by an internet service provider to store a website on. FTP is the protocol used to transfer local files onto the web host.

3. AFS is a free remote file storage space provided by MSU that allows users to backup local files and to access them anywhere with an internet connection.

4. The URL for my AFS space would be www.msu.edu/~leagueal.
